

## MANAGEMENT SYSTEM

Autostop has implemented a safety, quality and environmental management system, which is constantly monitored and continuously optimized during various phases of the production process. The raw materials and resources used to meet all the requirements of testing and international industry standards. Autostop is certified according to standards:

- IATF 16949
- ISO 14001
- ISO 45001
- ISO 50001
- TISAX® Assessment Scope SXTH6Y

Scope of Autostop Interiors, address: Leskovac, Serbia: Design and production of interior parts and covers from leather, fabric and other soft materials.

The company builds its approach on mutual cooperation between suppliers and customers. Good connectivity and interaction between the main processes, as well as the support process, achieves good interaction and coherence of the management system to respond to each task.

A special advantage, which Autostop has built through this approach, is the quick response and the possibility of flexibility towards the customer and other stakeholders, fast decision making, implementation, as well as the proposal of new solutions, all in order to satisfy all parties.
